TECHNICAL SKILLS

Operating Systems: Windows 10/11, MacOS, Linux (Ubuntu)

Programming & Scripting: C#, Python, Java, C/C++, JavaScript, SQL

Cloud & Dev Tools: Unity Engine, VMware, Dropbox, Microsoft Entra ID / Azure Active Directory (Azure AD), Amazon Web Services (AWS – fundamentals),

Certificates: NIMS ICS 100, 200, 700

EDUCATION

California Polytechnic State University, Pomona

Pomona, CA

Bachelor of Science in Computer Science

May 2026

Relevant Coursework: Database Fundamentals, Software Development, Computer Architecture, Data Structures, Artificial Intelligence

EXPERIENCE

City of Corona

Corona, CA

Help Desk 1

October 2025 – Present

- Provided Tier 1–2 technical support to 1,000+ city employees across multiple departments, including Police, Fire, and municipal facilities, ensuring high availability of IT systems, endpoints, and network services.
- Imaged, configured, and deployed Windows 10/11 endpoints using Microsoft SCCM and Intune, supporting endpoint management, device compliance, patching, and secure configuration standards.
- Installed, relocated, and decommissioned Cisco IP phones for end users, while assisting the network team with Cisco license management and tracking.
- Performed on-site and remote troubleshooting of hardware, operating systems, network connectivity, and enterprise applications, resolving incidents related to TCP/IP, DNS, VPN access, user accounts, and system performance.

Freelance IT Technician

Riverside County, CA

IT Support Technician & System Administrator

Jul 2022 – Present

- Coordinated and conducted on-site and remote support sessions with 10+ private clients to set up and maintain computers, printers, email accounts, and Windows software.
- Installed Windows and Linux systems, networks, and security tools.
- Configured and managed client Microsoft Outlook accounts, setting up and troubleshooting email connectivity using IMAP/SMTP for providers including AOL, Gmail, and other third-party mail services.
- Deployed and configured multiple systems for a growing local concrete business, contributing to their operational efficiency and scaling to over \$1M in annual revenue.

PROJECTS

Multi-Agent Tag AI | *Unity, C#*

April 2025

- Developed a multi-agent reinforcement learning environment in Unity where two AI agents (tagger and runner) compete in a 1v1 tag simulation.
- Designed reward functions and observation spaces to enable agents to learn navigation, evasion, and pursuit strategies.
- Trained agents using PPO and the Unity ML-Agents toolkit, analyzing training results to improve agent performance.

Custom State Machine Framework | *Unity, C#*

October 2023 - Present

- Engineered a reusable state machine framework, transitioning from enum-based control flow to a class-based polymorphic architecture
- Leveraged generics and composition to decouple state logic from specific entities, improving flexibility and maintainability
- Applied software engineering principles such as separation of concerns and polymorphism to support complex mechanics (e.g., movement states, wall-running, and multiplayer interactions)
